I prefer float-BMPs would need to be listed in ROE if "dragged" explaining how impacts would be minimized and restored. Any welding would require approval from Water Quality folks at Ecology. Will send recommendations I have identified to date shortly.

Hello Shayne,

- 1) Do we have any concerns if they float / drag the pontoons off the beach?
- 2) Do we have any concerns if they have to weld on site in order to make the pontoons float?

Thanks, but if they just float the things off the beach in Bremerton, then no permit from DNR would be required, correct?

I just want them off the beach.

Hello Chris,

If they do the demolition at the Bremerton site, they will need a Right-of-Entry from DNR. If they do the demolition on private tidelands in Port Orchard, they will not require an authorization to use State owned aquatic lands.

Any word from either of you if additional permits beyond the HPA will be required for removal of the submarine floats?

Thanks,
